

IN THE CLAIMS

1. (original) A panel for a solar rail or railing system, comprising:
first and second transparent, or, at least, translucent tempered glass panels;
an array of solar cells spaced from but connected to each other on a transparent or, at least translucent film sandwiched between the glass panels;
a bottom rail for supporting the sandwich of film and glass panels from a portion of a building; and
a top rail for an outlet conduit of the electrical connection of the solar cells.
2. (original) The panel according to claim 1, and another thereof with the bottom and top rails respectively connected to each other as bottom and top rail elements.
3. (original) The panel according to claim 1, wherein the top rail forms a handrail.
4. (original) The panel according to claim 2, wherein the top rail element forms a handrail.
5. (original) The panel according to claim 1, wherein the outlet conduit of the top rail is electrically connected to the building.
6. (original) The panel according to claim 2, wherein the outlet conduit of the top rail is electrically connected to the building.

7. (original) The panel according to claim 3, wherein the outlet conduit of the top rail is electrically connected to the building.
8. (original) The panel according to claim 4, wherein the outlet conduit of the top rail is electrically connected to the building.
9. (new) A panel for a solar rail or railing system, comprising:
 - first and second transparent or, at least, translucent tempered glass panels;
 - an array of solar cells spaced from but electrically connected to each other on a transparent or, at least, translucent film sandwiched between the glass panels;
 - a member for supporting the sandwich of film and glass panels from a portion of a building; and
 - an outlet electrically connected to the electrical connection of the solar cells.
10. (new) The panel according to claim 9, wherein at least one of the member is a bottom rail supporting the bottom of the sandwich or the outlet comprises a conduit in a top rail along a top of the sandwich.
11. (new) The panel according to claim 10, wherein the top rail forms a handrail.
12. (new) The panel according to claim 10, wherein the outlet comprises a conduit in at least one of the top and bottom rails.

13. (new) The panel according to claim 11, wherein the outlet comprises a conduit in at least one of the top and bottom rails.
14. (new) The panel according to claim 9, wherein the outlet is electrically connected to the building.
15. (new) The panel according to claim 10, wherein the outlet is electrically connected to the building.
16. (new) The panel according to claim 11, wherein the outlet is electrically connected to the building.
17. (new) The panel according to claim 12, wherein the outlet is electrically connected to the building.
18. (new) The panel according to claim 13, wherein the outlet is electrically connected to the building.
